

SHUBHI GUPTA

☎ 8081984106 | ✉ shubhigupta45678@gmail.com | 🌐 github.com/11Shubhigupta | 🔗 linkedin.com/in/shubhi-gupta-83a09b296

Skills

Languages: C, C++, Python, JavaScript with basic knowledge of SQL and strong analytical problem-solving capability.
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap emphasizing responsive layouts and scalable UI architecture.
Backend: Node.js, Express.js with RESTful API development, middleware integration, and authentication mechanisms.
Database: MongoDB and MySQL including schema modeling, indexing strategies, and performance optimization techniques.
Tools: Git, GitHub, VS Code, Postman, Multer, Cloudinary for debugging, file handling, media storage.
Core Concepts: Data Structures, Object-Oriented Programming, DBMS, and Operating Systems fundamentals.

Education

JSS Academy of Technical Education, Noida	2023–2027
B.Tech in Information Technology.	
Maharaja Public School, Ayodhya	2022
Class 12 (PCM) – 90% with strong mathematical foundation and analytical problem-solving skills.	

Experience

Full Stack Web Developer Intern	Aug 2025 – Sept 2025
Technohacks Private Limited Remote	
- Developed a Stock Market Dashboard integrating real-time financial APIs with interactive visual analytics and performance metrics tracking. - Built a Quiz Application with timer-based logic, automated scoring, and optimized frontend state management for improved user interaction. - Enhanced UI consistency, improved component modularity, reduced unnecessary rendering, and followed structured Git workflows for scalable architecture.	
Microsoft Mobile Innovation Lab (MMIL) Technical Society	2023 – 2026
Contributed to technical workshops and UI/UX initiatives within the society.	

Projects

AI Virtual Assistant – Full Stack Intelligent Assistant Platform
<i>MERN Stack, Tailwind CSS, Gemini AI, JWT, Cloudinary, Multer, Web Speech API</i>
- Developed an AI-powered virtual assistant platform enabling users to create customizable assistants with voice and text interaction using Web Speech API. - Integrated Gemini AI with JWT-based authentication and protected routing for secure real-time user interactions. - Built customization features including assistant name editing and image upload using Cloudinary and Multer for personalized assistant profiles.

TomatoBite – Full Stack Food Ordering Website

MERN Stack

- Developed a full stack food ordering platform with authentication, cart management, and order processing.
- Designed REST APIs for menu management, order tracking operations, and structured user handling mechanisms.
- Created a responsive UI with advanced filtering logic and seamless navigation experience across devices.

TradeSphere – Full Stack Stock Trading Platform

React.js, Node.js, Express.js, MongoDB, JWT

- Built a real-time stock trading platform with live market visualization, portfolio tracking, and transaction analytics.
- Implemented secure JWT-based authentication, protected routing, and organized role-based authorization system.
- Integrated live pricing updates, candlestick chart rendering, and optimized backend APIs for scalable data processing.

Certifications

- Hackathon Participation Certificate Microsoft CodeForge Event recognizing technical innovation contribution.
- Web Development Training Certificate covering practical full stack implementation and deployment fundamentals.
- Android Developer Fundamentals Course focused on core mobile application architecture principles.

Technical Achievements

- Solved 500+ DSA problems on LeetCode covering arrays, trees, graphs, and sliding window patterns.
